I've had a chance to do a cursory review. It appears that Jeff Rodin, OSC, and Mark Ader, SAM were involved and the case deserves to be revisited. As both (b) (6), I've asked Monica Tonel and Brandon Perkins to assume OSC and SAM responsibilities respectively. They will continue a record review and make any necessary contact with the state and local partners, and circle back to us for their recommendations.

If you have any concerns, please let me know.

Beth,

FYI – Here is the original message of the one that I just copied you on related to a gun range in Kitsap County.

Thank you for figuring out next steps related to this site.

Good day, Mr. Terada. I am writing to advise you of recent events regarding the former shooting range located at 4900 Seabeck Hwy. The first two attachments by and on the behalf of the State Recreation and Conservation Office (RCO) address Conversion (demand for repayment) of a RCO Grant issued to make improvements at the subject shooting range.

Washington State Department of Ecology ERTS Report #631120 dated 27 Dec 2011, is germane.

This shooting range has been under two concurrent Superior Court injunctions against discharge of firearms since 2 December 2016. Per the EPA Region 10 report "Integrated Assessment Kitsap Rifle and Revolver Club, November 2011" lead, copper, and other heavy metals continue to litter to property and adjacent wetlands in the Chico Creek watershed. Attachment 3 is the Chapter 9 summary for the EPA Region 10 Integrated Assessment.

I wish to inquire what actions may be initiated toward preliminary remediation planning for this site.
